The copy filmed here has been reproduced thanks to the generosity of:

Université de Sherbrooke

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Université de Sherbrooke

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

P R E F A C E .

IT is almost universally acknowledged, among learned men, that the definitions in Johnson's Dictionary are superiour to all others; and it is also conceded, that Walker's pronunciation is, with few exceptions, the proper standard. A Dictionary, in which the excellences of these two authors are combined, must, therefore, be the best adapted to the present state of the English language.

A very valuable work has been executed on this plan, and lately published in Boston. It is entitled "Johnson's and Walker's English Dictionaries combined," and contains all the words which have been added to Johnson's Dictionary by Dr. Todd. The following Abridgement of this work, in the preparation of which the Editor has been materially assisted by Dr. Rees' Abridgement of *Todd's Johnson*, will be found to contain a very copious selection of words; and it has been a leading object to give the definitions and notation with great plainness and accuracy.

The Appendix of Americanisms will assist the scholar in detecting the words in common use, which are not well authorized, and will show him the difference between English and American usage,

PREFACE.

The Principles of Pronunciation, which follow this Preface, are selected almost entirely from Walker's Dictionary. It is not common to study these Principles in our schools; and, hence, Dictionaries are very imperfectly understood. The Editor earnestly recommends that they should be studied thoroughly and frequently by every scholar who can understand them; and that teachers should require them to be applied to every lesson from the Dictionary.

To render these Principles intelligible and interesting, and to impress them on the memories of pupils, they are accompanied in this Abridgement with suitable QUESTIONS. These will be found a valuable improvement; and it is hoped that, on the whole, this Dictionary for Schools possesses more excellences, and fewer faults, than any that has been offered to the publick.

The word sleigh is appropriated to a travelling vehicle which is drawn by horses ; while that vehicle which is used for transporting heavy articles, and drawn upon snow by oxen or horses, is called sled. The word commonly used in England for both is sledge, though sled seems to be preferred by Johnson.*

—nó, móve, nór, nót; —tábe, táb, bóll; —óll; —póond; —thin, thís.

Mr. Webster defines it as follows: "To saddle; to accoutre; to fit out; to prepare;" which is also the definition of *Entick*. In cases in which a New Englander would use *to tackle*, an Englishman would use *to harness*.

Tact. [T.] s. Mr. Todd, in his second edition, adds to the definition of this word,—"The sense of feeling: an old word, long disused; but of late revived in the secondary senses of *touch*, as a masterly or eminent effort, and the power of exciting the affections."

V.

VARIATE. [T.] Mr. Todd has inserted this word with the definition of "To change; to alter;" but it does not appear to be in use at present in England. RULES

FOR PRONOUNCING THE VOWELS OF

GREEK AND LATIN PROPER NAMES.

1. EVERY vowel, with the accent on it, at the end of a syllable, is pronounced, as in English, with its first long open sound: thus *Cæ'to*, *Phi-lo-mæ'la*, *Ori'on*, *Phu'cion*, *Luci'fer*, &c., have the accented vowels sounded exactly as in the English words *pa'per*, *me'tre*, *spi'der*, *no'ble*, *tu'tor*, &c.

2. Every accented vowel, not ending a syllable, but followed by a consonant, has the short sound as in English: thus *Man'tius*, *Pen'theus*, *Pin'darus*, *Col'chis*, *Cur'tius*, &c., have the short sound of the accented vowels, as in *man'ner*, *plen'ty*, *prin'ter*, *col'lar*, *cur'few*, &c.

3. Every final *i*, though unaccented, has the long open sound: thus the final *i* forming the genitive case, as in *magis'tri*, or the plural number, as in *De'ci*, has the long open sound, as in *vital*; and this sound we give to this vowel in this situation, because the Latin *i* final in genitives, plurals, and preterperfect tenses of verbs, is always long; and consequently, where the accented *i* is followed by *i* final, both are pronounced with the long diphthongal *i*, like the noun *eye*, as *Achi'vi*.

4. Every unaccented *i*, ending a syllable not final, as that in the second of *Alcibiades*, the *Hernici*, &c., is pronounced like *e*, as if written *Alcebiades*, the *Herneci*, &c. So the last syllable but one of the *Fabii*, the *Horatii*, the *Curvatii*, &c., is pronounced as if written *Fa-be-i*, *Ho-ra-she-i*, *Cu-re-a-she-i*; and therefore, if the unaccented *i* and the diphthong *æ* conclude a word, they are both pronounced like *e*, as *Harp'ice*, *Har-py'-e-e*.

5. The diphthongs *æ* and *œ*, ending a syl-

ble with the accent on it, are pronounced exactly like the long English *e*, as *Cæsar*, *Cælia*, &c., as if written *Cæ'sar*, *E'ta*, &c.; and like the short *e*, when followed by a consonant in the same syllable, as *Dard'ulus*, *Cel'ipus*, &c., pronounced as if written *Dard'ulus*, *Edd'ipus*, &c. The vowels *ei* are generally pronounced like long *i*.

6. *Y* is exactly under the same predicament as *i*. It is long when ending an accented syllable, as *Cy'rus*; or when ending an unaccented syllable, if final, as *Æ'gy*, *Æ'py*, &c.; short when joined to a consonant, in the same syllable, as *Lyc'idus*; and sometimes long and sometimes short, when ending an initial syllable not under the accent, as *Ly-cur'gus*, pronounced with the first syllable like *lie*, a falsehood; and *Lysimachus*, with the first syllable like the first of *legion*; or nearly as if divided into *Lys-im'-a-chus*, &c.

7. *A*, ending an unaccented syllable, has the same obscure sound as in the same situation in English words; but it is a sound bordering on the Italian *a*, or the *a* in *fa-ther*, as *Dia'nu*, where the difference between the accented and unaccented *a* is palpable.

8. *E* final, either with or without the preceding consonant, always forms a distinct syllable, as *Penelope*, *Hippocrene*, *Eroe*, *Am'atrite*, &c.

Rules for pronouncing the Consonants of Greek and Latin Proper Names.

9. *C* and *g* are hard before *a*, *o*, and *u*, as *Cato*, *Comus*, *Cures*, *Galba*, *Gorgon*, &c.:

soft before *e*, *i*, and *y*, as *Cebes*, *Scipio*, *Scylla*, *Cinna*, *Geryon*, *Gela*, *Gillus*, *Gyges*, *Gymnosophistæ*, &c.

10. *T*, *s*, and *c*, before *ia*, *ie*, *ii*, *io*, *iu*, and *ui*, preceded by the accent, in Latin words, as in English, change into *sh* and *zh*, as *Tatian*, *Stadius*, *Portius*, *Portia*, *Socias*, *Caduceus*, *Accius*, *Helvetii*, *Morsia*, *Hesiod*, &c.; pronounced *Tashean*, *Stasheus*, *Porsheus*, *Porshea*, *Sosheus*, *Cadusheus*, *Aksheus*, *Helveshei*, *Mezhea*, *Hexheod*, &c. But, when the accent is on the first of the diphthongal vowels, the preceding consonant does not go into *sh*, but preserves its sound pure, as *Miltiades*, *Antiates*, &c.

11. *T* and *s*, in proper names, ending in *tia*, *sia*, *cyon*, and *sion*, preceded by the accent, change the *t* and *s* into *sh* and *zh*. Thus *Phocion*, *Sicyon*, *Cercyon*, are pronounced exactly in our own analogy, as if written *Phoshean*, *Sishean*, and *Sershean*: *Artemisia* and *Aspasia* sound as if written *Artemizhea* and *Aspazhea*: *Galatia*, *Aratia*, *Alotia*, and *Batia*, as if written *Gulashea*, *Arashea*, *Aloshea*, and *Bashea*: and if *Atia*, the town in Campania, is not so pronounced, it is to distinguish it from *Asia*, the eastern region of the world.

12. *Ch*. These letters before a vowel are always pronounced like *k*, as *Chabrias*, *Colchis*, &c.; but when they come before a mute consonant at the beginning of a word, as in *Chthonia*, they are mute, and the word is pronounced as if written *Thonia*. Words beginning with *Sche*, as *Schedius*, *Scheria*, &c., are pronounced as if written *Skedius*, *Skeria*, &c.; and *c* before *n* in the Latin prænomen *Cneus* or *Cnæus*, is mute; so in *Cnopus*, *Cnosus*, &c., and before *t* in *Cteutus*, and *g* before *n* in *Gnidus*; pronounced *Nopus*, *Nosus*, *Teatus*, and *Nidus*.

13. At the beginning of Greek words we frequently find the uncombinable consonants *mn*, *tn*, &c., as *Mnemosyne*, *Mnesidamus*, *Mneus*, *Mnesteus*, *Tmolus*, &c. These are to be pronounced with the first consonant mute, as if written *Nemosyne*, *Nesidamus*, *Neus*, *Nesteus*,

Molus, &c., in the same manner as we pronounce the words *bdellium*, *pneumatick*, *gnomon*, *mnemonicks*, &c., without the initial consonant. The same may be observed of the *c* hard like *k*, when it comes before *t*, as *Ctesiphon*, *Ctesippus*, &c. Some of these words we see sometimes written with an *e* or *i* after the first consonant, as *Menesteus*, *Timolus*, &c., and then the initial consonant is pronounced.

14. *Ph*, followed by a consonant, is mute, as *Phthia*, *Phthiotis*, pronounced *Thia*, *Thiotis*, in the same manner as the naturalized Greek word *Phthisick*, pronounced *Tisick*.

15. *Ps*: *p* is mute also in this combination, as *Psyche*, *Psammetichus*, &c., pronounced *Syke*, *Sammeticus*, &c.

16. *Pt*: *p* is mute in words beginning with these letters, when followed by a vowel, as *Ptolemy*, *Pterilas*, &c., pronounced *Tolemy*, *Terilas*, &c.: but when followed by *t*, the *t* is heard, in *Tlepolemus*: for, though we have no words of our own with these initial consonants, we have many words that end with them, and they are certainly pronounced. The same may be observed of the *z* in *Zmilaces*.

17. The letters *s*, *x*, and *z*, require but little observation, being generally pronounced as in pure English words. It may, however, be remarked, that *s*, at the end of words, preceded by any of the vowels but *e*, has its pure hissing sound; as *mas*, *dis*, *os*, *mus*, &c.: but when *e* precedes, it goes into the sound of *z*, as *pes*, *Thersites*, *vates*, &c. It may also be observed, that, when it ends a word preceded by *r* or *n*, it has the sound of *z*. Thus the letter *s* in *mens*, *Mars*, *mors*, &c., has the same sound as in the English words *hens*, *stars*, *wars*, &c. *X*, when beginning a word or syllable, is pronounced like *z*; as *Xerxes*, *Xenophon*, &c., are pronounced *Zerkzes*, *Zenophon*, &c. *Z* is uniformly pronounced as in English words: thus the *z* in *Zeno* and *Zeugma* is pronounced as we hear it in *zeal*, *zone*, &c.

PRONUNCIATION

OR

GREEK AND LATIN PROPER NAMES.

*** When a word is succeeded by a word printed in Italicks, the latter word is merely to spell the former as it ought to be pronounced. Thus *Akasheus* is the true pronunciation of the preceding word *Acacius*: and so of the rest.

*** When the letters Eng. are put after a word, it is to show that this word is the preceding word anglicised. Thus *Lucan*, Eng. is the Latin word *Lucanus*, changed into the English *Lucan*.

* Every a ending a syllable, with the accent upon it, is pronounced like the a in the English words *fa-vour*, *ta-per*, &c.
† Every unaccented a, whether initial, medial, or final, ending a syllable, has an obscure sound, bordering on the a in *father*.

‡ *Achabytos*.—Ch, in this and all the subsequent words, have the sound of k. Thus *Achabytos*, *Achæa*, *Achates*, &c., are pronounced as if written *Akabytos*, *Akæa*, *Akates*, &c.

* *Æa*.—The diphthong is merely ocular, for the *a* has no share in the sound, though it appears in the type. Indeed, as we pronounce the *a*, there is no middle sound between that letter and *e*, and therefore we have adopted the last vowel, and relinquished the first. This, among other reasons, makes it probable that the Greeks and Romans pronounced the *a* as we do in *water*, and the *e* as we hear it in *where* and *there*; the middle or mixt sound, then, would be like *u* in *father*, which was probably the sound they gave to this diphthong.

† *Ægis*.—This diphthong, though long in Greek and Latin, is in English pronunciation either long or short, according to the accent or position of it. Thus, if it immediately precedes the accent, as in *Ægeus*, or with the accent on it, before a single consonant, in a word of two syllables, it is long, as in *Ægis*; before two consonants, it is short, as in *Ægles*; or before one only, if the accent be on the antepenultimate, as in *Æropus*.

* *Apotheosis*.—When we are reading Latin or Greek, this word ought to have the accent on the penultimate syllable; but in pronouncing English we should accent the antepenultimate:

"Allots the prince of his celestial line

"An *apothæsis* and rites divine."—*Garth*

† *Arbela*, the city of Assyria, where the decisive battle was fought between Alexander and Darius; and the city in Palestine of that name, have the accent on the penultimate; but *Arbela*, a town in Sicily, has the accent on the antepenultimate syllable.

* *Granicus*.—As Alexander's passing the river *Granicus* is a common subject of history, poetry, and painting, it is not wonderful that the common ear should have given in to a pronunciation of this word more agreeable to English analogy than the true classical accent on the penultimate syllable. The accent on the first syllable is now so fixed as to make the other pronunciation savour of pedantry.—See **ANDRONICUS**.

VOIT RULES OF

FOR PRONOUNCING

SCRIPTURE PROPER NAMES.

1. IN the pronunciation of the letters of the Hebrew proper names, we find nearly the same rules prevail as in those of Greek and Latin. Where the vowels end a syllable with the accent on it, they have their long open sound, as *Na'-bal*, *Je'-hu*, *Si'-rach*, *Go'-shen*, and *Tu'-bal*.

2. When a consonant ends the syllable, the preceding vowel is short, as *Sam'-u-el*, *Lem'-u-el*, *Sim'-e-on*, *Sol'-o-mon*, *Suc'-coth*, *Syn'-a-gogue*.

3. Every final *i*, forming a distinct syllable, though unaccented, has the long open sound, as *A'-i*, *A'-ris'-a-i*.

4. Every unaccented *i*, ending a syllable, not final, is pronounced like *e*, as *A'-ri-el*, *Ab'-di-el*, pronounced *A'-re-el*, *Ab'-de-el*.

5. The vowels *ai* are sometimes pronounced in one syllable, and sometimes in two. When these letters are pronounced as a diphthong in one syllable, they are sounded nearly like our English diphthong in the word *daily*, as *Ben'-ai'-ah*, *Hu'-shai*, *Hu'-rai*, &c. The only point necessary to be observed in the sound of this diphthong is, the slight difference we perceive between its medial and final position: when it is final, it is exactly like the English *ay* without the accent, as in *holiday*, *roundelay*, *galloway*; but when it is in the middle of a word, and followed by a vowel, the *i* is pronounced as if it were *y*, and as if this *y* articulated the succeeding vowel: thus *Ben'-ai'-ah* is pronounced as if written *Ben'-ai-yah*.

6. *Ch* is pronounced like *k*, as *Chebar*, *Chemosh*, *Enoch*, &c. pronounced *Kebar*, *Kemosh*, *Enock*, &c. *Chemosh* and *Rachel* seem to be perfectly anglicised, as the *ch* in these words is always heard as in the English words *cheer*, *child*, *riches* &c. The same may be observed

of *Cherub*, signifying an order of angels: but when it means a city of the Babylonish empire, it ought to be pronounced *Ke'-rub*.

7. Almost the only difference in the pronunciation of the Hebrew, and the Greek and Latin proper names, is in the sound of the *g* before *e* and *i*: in the two last languages this consonant is always soft before these vowels, as *Gellius*, *Gippius*, &c., pronounced *Jellius*, *Jippius*, &c.; and in the first it is hard; as *Gera*, *Gerizim*, *Gideon*, *Gilgal*, *Megiddo*, *Megiddon*, &c.

8. Gentiles, as they are called, ending in *ites* and *ites*, as *Philistines*, *Hivites*, *Hittites*, &c., being anglicised in the translation of the Bible, are pronounced like formatives of our own, as *Philistins*, *Whitfieldites*, *Jacobites*, &c.

9. The unaccented termination *ah*, so frequent in Hebrew proper names, ought to be pronounced like the *a* in *father*. The *a* in this termination, however, frequently falls into the indistinct sound heard in the final *a* in *Africa*, *Aetna*, &c.; nor can we easily perceive any distinction in this respect between *Elijah* and *Elisba*; but the final *h* preserves the other vowels open, as *Colhozeh*, *Shilch*, &c., pronounced *Colhozee*, *Shilo*, &c. The diphthong *ei* is always pronounced like *ee*: thus *Sa-mei'-us* is pronounced as if written *Sa-mee'-us*. But if the accent be on the *ah*, then the *a* ought to be pronounced like the *a* in *father*; as *Tah'-e-ra*, *Tah'-pe-nos*, &c.

10. It may be remarked, that there are several Hebrew proper names, which, by passing through the Greek of the New Testament, have conformed to the Greek pronunciation; such as *Aseldama*, *Genesareth*, *Bethphage*, &c., pronounced *Aseldama*, *Jenezareth*, *Bethphaje*, &c.

PRONUNCIATION

OF

SCRIPTURE PROPER NAMES.

* * When a word is succeeded by a word printed in Italicks, this latter word is merely to spell the former as it ought to be pronounced. Thus *As'e-fu* is the true pronunciation of the preceding word *Ac'i-plu*; and so of the rest.

* * The figures annexed to the words refer to the Rules prefixed to the Vocabulary. Thus the figure 3 after *Ab'di* refers to Rule the 3d,

for the pronunciation of the final *i*; and the figure 5 after *A-bish'a-i* refers to rule the 5th, for the pronunciation of the unaccented *ai*: and so of the rest.

[The letter (a) annexed to a word refers the reader to the *Variations* of *Perry*, or *Fulton* and *Knight*, found at the end of this Vocabulary.]
